Cynde Meinhart

Sir:

These remarks are submitted with a request for continued examination filed this date.

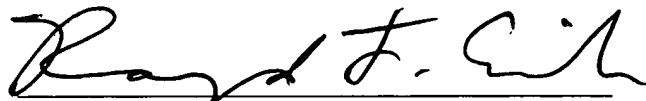

In the advisory action of April 20, 2004, the Examiner alleged that the declaration of Anne Ebbesen, filed on April 6, 2004, was faulty on the grounds it was dated "06/02/04." It should be apparent that Ms. Ebbesen used the European convention of "dd/mm/yy" in abbreviating the date February 6, 2004. Also, the Examiner baldly states Applicants' response, filed on April 6, 2004, "clearly does not overcome the applied Jerdee et al. reference," but the Examiner made no argument in support of this statement. As Applicants stated previously,

Jerdee does not provide an example of using aseptic packaging with oxygen scavenging packaging articles and thus, the reference did not recognize the prospect that the sterilization technique could also serve to reduce the oxygen scavenging induction period. Jerdee does not teach or suggest the claimed limitation of reducing the induction period of oxygen scavenging.
